WORKSHOP

3 - 4 July **2017** | Angers - France

TcPO₂

medicap
homecare

 **PERIMED**

RADIOMETER 

CHU
ANGERS
CENTRE HOSPITALIER
UNIVERSITAIRE

You know the use of transcutaneous oximetry (TcPO₂) at rest in critical limb ischemia. Now, come to Angers and discover TcPO₂ while walking in claudication of suspected or debatable arterial origin. The technique provides objective arguments or exercise-induced blood flow impairment at the proximal and distal levels simultaneously, on both sides. Today, many referral centers in France use it.

This two days interactive session with practical cases and discussions will give you all the required skills to use the technique in your lab.

Tentative agenda

Monday 3rd July 2017

morning

Transcutaneous oximetry: Theoretical aspects, tricks and traps

TcPO₂ at rest: From the textbook to the laboratory

afternoon

Hands on session with various TcPO₂ devices (Medicap, Perimed, Radiometer...)

Tuesday 4th July 2017

morning

TcPO₂ while walking: From theory to practice

afternoon

TcPO₂ while walking: Analysis and discussion of clinical cases

Audience

Physicians, vascular nurses or vascular technicians. No basic knowledge of the technique itself is required but vascular background is needed.

Registration

295 euros (includes access to sessions, lunches and pauses)

Limited to 21 persons to enable interactivity
